

# GLASSOS® CRYSTAL WHITE

## SPEC SHEET

**Product Description** - GLASSOS® Crystal White is pure white crystallized glass. This unique building material is made using a very sophisticated technique of sintering molten glass and select minerals then fusing the sintered crystals together under intense high temperature. The result is a versatile building material that is nearly identical to Pure White Thassos Marble, yet unlike Thassos, it is as hard as granite and never requires sealing. Its superior qualities include resistance to acid and alkali as well as extreme hardness and zero porosity. Under normal use the surface will not stain or scratch. GLASSOS® is stocked in a polished and Satin finish.

**Sizes and availability** - Tiles are stocked in 12x12x1/2, 18x18x1/2, 12x24x 1/2, 24x24 x 1/2\*. Slabs are stocked in 56x120x3/4\* and 56x120x1-1/4\* Cut to size, special shapes and sizes available. Tile and slab thickness tolerances 1/8 + -

**Applications** – Walls, floors, counter tops, vanity tops, shower jambs, sills and exterior panels

**Care and Maintenance** – No sealer is required. Use a glass cleaner or PH neutral soap and water with a soft cloth or paper towel. Avoid scrubbing sponges and abrasive metal objects. Always use a cutting board and trivet to protect the surface.

\*Thicknesses are nominal

Test	Results	Test Method
Mohs Hardness	7	MOHS Scratch Hardness
Water Absorption	.04	ASTM C373
Resistance to Chemicals	Class E	ASTM C650
Abrasion Resistance	Class 2	ASTM C1027
Crazing Resistance	No evidence of crazing	ASTM C424
Static Coefficient of Friction	Wet .50, Dry .77	ASTM C1028
Stain Resistance	Class A	ASTM C1378

*Sold exclusively through:*
